

## Bike Light/Headlamp (BL-03)

The BL-03 Headlamp is a powerful, tactical LED illuminator used for target acquisition and identification. Multipurpose, and can be used as miner lamp, bicycle light and others.

### BL-03 Information

Voltage: 7.5V

Capacity: 2200 mAh

Current: 2A

Light flux: 1000Lm

Bulb life: Cree XML-T6, 4 hours in high, 60 hours in weak.

Battery group: 4\*18650

### PREPARATION FOR USE

### Battery Installation

Connecting the battery to the lamp, then you can perform the following functions through blue switch button

#### 1: Function modes

**Constant mode:** quick click the switch button once when the light is off, the light reached its maximum output.

**Strobe mode:** double click the switch within 0.5 seconds when the light is off, the light reaches its strobe mode, 100% brightness.

**Dimming mode:** Long press the switch when the light is on, the light output will change from high to low. Release the button when it arrive the needed brightness; Long press the switch button again, the output will change from low to high. That's high output-low output-high output recycle. The time pause is 3 seconds between 100% and 1%.

#### 2. Red led and blue red on switch button

**Blue led on:** shows the battery voltage is between 7V-6V, the battery capacity left 50%

**Red led on:** shows the battery voltage is below 6V, the battery capacity left 5%, which means you should charge the battery now.

### MAINTENANCE

**Cleaning:** Whenever the BL-03 becomes dirty, or after exposure to salt water, it should be cleaned by rinsing with fresh water or mild soap and water and then wiped dry with a soft cloth. The illumination lens may be cleaned using a soft cloth with water, alcohol, or general purpose window cleaner.

### Accessories Parts:

- ※Battery group: 4\*18650
- ※Charger
- ※Connecting line
- ※Container bag

## **WARNINGS**

**This Headlamp is the light output devices; working hours in a row will have a lot of heat, in order to ensure the normal use of products, please carefully read the warnings and suggestions:**

1. The BL-03 is powered by 4 rechargeable Lithium-ion batteries. Lithium batteries can explode or cause burns if short-circuited, punctured, or disassembled.
2. Prior to use, inspect all batteries for cracks, leaks, or bulging.
3. Never install a defective battery in the BL-03.
4. Do not use the BL-03 in environments containing an explosive atmosphere or in areas where gasoline, paints, solvents, or other flammable liquids are stored.
5. The BL-03 will generate heat. Do not hold the bezel or lens against any portion of the human body.
6. Do not let a child without adult supervision when using the flashlight.
7. Do not light a flashlight to direct exposure to human and animal eyes.
8. Long storage and transportation, please remove the battery.

## **WARRANTY**

The one year warranty covers defects in materials or workmanship. Batteries are not covered by this warranty. Modifications to the light or improper use also void this warranty. If you want to replace important parts, you should pay the cost.
